

AI/GenAI at HCLTech

An overview

The rise of GenAI coupled with the rapid democratization of AI across industries has ushered in an unprecedented era of productivity, efficiency and innovation for global enterprises.

Our flagship AI/GenAI offerings

As a **trusted wingman**, HCLTech helps clients navigate the maze of these AI-enabled opportunities and challenges through a focused and pragmatic portfolio of platforms and services that help enterprises kickstart or accelerate their AI journey:

AI Force

a trademarked and patented platform that uses GenAI to drive service transformation across the software engineering and IT operations lifecycle

AI Foundry

is a system integration and managed services offering that provides value stream innovation by combining the power of Data, AI, and Cognitive infrastructure.

AI & Cloud Native Labs

Our global network of AI & Cloud Native Labs offer consulting services and experiential spaces for organizations to go from idea to MVP to production, swiftly.

AI Engineering

delivers AI chip design, development, and tape-out along with hardware engineering prowess for building the next-gen AI data centers that handle the increasingly complex AI workloads.

Our capabilities are bolstered by our best-of-breed partnerships across semiconductor manufacturers, hyperscalers, and OEMs.

When combined with our engineering DNA, proven track record in AI, full-stack GenAI capabilities, an array of industry-focused repeatable solutions (IFRS), and our passionate workforce, we drive service transformation and value stream innovation and help our clients deploy AI for:

And much, much more.

We help our clients future-proof their business by delivering scalable, secure, high-performing and responsible AI solutions that truly deliver ROI.

AI that delivers ROI

A healthcare provider uses a GenAI-powered clinical advisor to reduce clinician burnout, provide personalized care, and unlock cost savings

A bank is able to transform its IT landscape by modernizing hundreds of legacy applications through AI Force

A technology major is able to do swift and efficient design, development, and tape-out of AI chips for training, video acceleration, and inference

An industrial tools manufacturer has seen an increase in online sales and enhanced customer experience through a virtual shopping assistant

Value stream innovation

HCLTech AI & Cloud Native Labs

provide safe and collaborative space for clients to create new GenAI and AI ideas and bring them to life through MVPs

Need for innovation-led transformation in a highly competitive world

Share vision with a trusted advisor

Art of the possible

How can I use AI to create enterprise competitiveness?

Evolving needs of end users

Cost and quality pressures from business stakeholders

Not sure what we want!

How to build it?

What to do?

Let's do this together!

- Domain expertise
- Transparent partnership
- Culture of experimentation
- Technical credibility

Art of the possible showcase

Partner solution showcase

Catalyzing the idea

Engineering acceleration

Creation of MVP

Educate and reskill the workforce

We show and build what good looks like

- Quality
- Velocity
- Productivity
- Business outcomes

Scalable deployment

A continuous journey of transformation towards

AI-led actionable impact

We help our clients future-proof their business by delivering scalable, secure, high-performing and responsible AI solutions that truly deliver ROI.
